

**Sacred Heart Canossian College**  
**Biology Department**  
**Guidelines for application of Biology Explorer**

This Award aims to:

- help students to develop self-initiative and good learning attitude in studying biology;
- encourage students to expose more to the biological world and link the subject to their daily lives, through the participation in various biology-related co-curricular activities (e.g. services, workshops, competitions, trainings, visits);
- encourage students to read more biological articles (e.g. books, newspaper, magazines, on-line websites) and hence assist in developing their abilities of self-learning.

Requirements to obtain this award:

The applicants have to read more biological articles and join more biology-related co-curricular activities / services with written reflections and actively participate in class throughout the year.

Participants should have a good learning attitude throughout the academic year and are willing to help others on the subject matter.

<b>Category</b>	<b>S4 &amp; S5</b>
1. Reading biological articles and/or participating in biology-related co-curricular activities with written reflections	<u>Number required:</u> <b>3 or above / term</b> <u>Reflections:</u> able to enrich biological knowledge in various aspects and improve self-learning skills
2. Learning attitude and participation in class	Showing a good learning attitude and participating actively throughout the year
